Education

STI College

Bachelor of Science in Information Technology GPA: 1.36

Tanauan City, Batangas

August 2024

- Relevant Coursework: Graduate as Cum laude Candidate.
- Thesis: Online Dermatology Reservation System.

Experience

Yamaha Motor Philippines

Software Engineer Intern

LIMA Technology Center

Feb 2024 – May 2024

- Contributed to development of new system features and functionality using PHP, JS, HTML5, CSS and Bootstrap Framework.
- Wrote clean, maintainable and well documented code adhering to code standards and best practices.
- I participated in code reviews to gain valuable feedback and insights from experienced developers.

Yamaha Motor Philippines

Software Engineer

LIMA Technology Center

Sept 2024 -Jan 2026

- Optimized application code to improve system performance and reduce page load times, enhancing overall user experience.
- Developed and maintained scalable web applications following best practices in software development.
- Strengthening system security by identifying and addressing vulnerabilities through secure coding and regular testing.
- Agile methodologies in the development lifecycle, collaborating with cross-functional teams to deliver features efficiently.
- Designed user-friendly interfaces to improve usability and overall system accessibility.
- Assisted in project planning, task management, and coordination to ensure timely delivery of development milestones.
- Managed basic cloud infrastructure on **Amazon Web Services (AWS)**, including handling EC2 instances, performing remote access/administration, and supporting deployment-related activities.
- Utilized AI-assisted development tools to improve coding efficiency, automate repetitive tasks, and enhance problem-solving during the development process.

Yamaha Motor Philippines

Cybersecurity Analyst

LIMA Technology Center

Jan 2026 - Present

- Conducted network and application security scanning using Nmap and Burp Suite to enhance server security and mitigate potential risks.
- Built and maintained a Moodle-based Cybersecurity LMS platform.
- Assisted in server hardening and security configuration.
- Supported cybersecurity operations and infrastructure management.
- Designed and executed phishing simulation campaigns to assess employee security awareness and improve organizational resilience against social engineering attacks.
- Conducting quarterly cybersecurity awareness to employees.
