

JOHN ALDIN M. ARGUELLES

Cybersecurity Analyst | Software Engineer

Santo Tomas, Batangas, Philippines • arguellesjohnaldin2@gmail.com • +63 967 256 2065

PROFESSIONAL SUMMARY

Cybersecurity Analyst and Software Engineer with experience in cybersecurity operations, web application development, system automation, and infrastructure support. Skilled in PHP, JavaScript, MySQL, WordPress, AWS, Linux, security testing, and workflow automation using Make.com. Experienced in developing internal business systems, cybersecurity platforms, phishing simulations, and automated document/file workflows.

PROFESSIONAL EXPERIENCE

Yamaha Motor Philippines — LIMA Technology Center

Cybersecurity Analyst

Jan 2026 – Present

- Conduct security assessments and network/application scanning using Nmap and Burp Suite to identify vulnerabilities and security risks.
- Develop and maintain a Moodle-based Cybersecurity Learning Management System (LMS) for cybersecurity training and awareness.
- Support server hardening, security configuration, infrastructure management, and cybersecurity operations.
- Design and execute phishing simulation campaigns to assess employee security awareness and resilience against social engineering.
- Conduct cybersecurity awareness activities and support employee security education.
- Assist in monitoring and managing security-related systems, infrastructure, and activities.

Software Engineer

Sept 2024 – Jan 2026

Yamaha Motor Philippines — LIMA Technology Center

- Developed and maintained web-based business applications using PHP, JavaScript, HTML, CSS, Bootstrap, AJAX, jQuery, and MySQL.
- Optimized application performance, code structure, and page load times to improve system usability.
- Implemented secure coding practices and performed application testing to identify and address vulnerabilities.
- Designed responsive and user-friendly interfaces for internal business applications.
- Managed application deployment and basic AWS infrastructure, including EC2 administration and remote server access.
- Collaborated with cross-functional teams using Agile development practices to deliver system requirements and project milestones.
- Used AI-assisted development tools to improve development efficiency and automate repetitive development tasks.

Software Engineer Intern

Feb 2024 – May 2024

Yamaha Motor Philippines — LIMA Technology Center

- Developed system features using PHP, JavaScript, HTML5, CSS, and Bootstrap.
- Wrote maintainable and documented code following development standards and best practices.
- Participated in code reviews and collaborated with experienced developers to improve implementation quality.

WordPress Developer & Make.com Automation Specialist

2026 – Present

Freelance / Project-Based

- Develop and customize WordPress websites and business portals based on client requirements.
- Build automated workflows using Make.com to connect WordPress, forms, APIs, databases, and external platforms.
- Integrate third-party APIs to automate file uploads, document processing, data synchronization, and system workflows.
- Develop dynamic WordPress pages that retrieve and display data from external APIs and databases.
- Implement automated document and PDF workflows, including integration with Clinked and WordPress.
- Configure Contact Form 7 workflows and connect submitted data/files to automated processing pipelines.
- Troubleshoot API requests, webhook responses, data mapping, and automation errors across connected platforms.

TECHNICAL SKILLS

Programming: PHP, JavaScript, HTML5, CSS, SQL

Web Development: WordPress, Bootstrap, AJAX, jQuery, Responsive Web Development

Database: MySQL, MariaDB, SQL, phpMyAdmin

Automation & Integration: Make.com, REST APIs, Webhooks, API Integration

Cybersecurity: Nmap, Burp Suite, Kali Linux, Vulnerability Scanning, Security Testing, Phishing Simulation

Cloud & Infrastructure: AWS, EC2, Linux, Ubuntu, Windows

Tools: Git, VS Code, VMware, Moodle, Power Apps, AI-assisted Development Tools

PROFESSIONAL STRENGTHS

Problem Solving • Critical Thinking • Project Management • System Development • Security Analysis • Automation • Technical Troubleshooting
